The Rowland Fellowship provides an unparalleled opportunity to establish an independent research career. We seek the best young experimentalists in energy science and engineering. We look forward to learning about your innovative ideas.
The Rowland Institute at Harvard is seeking applications for Rowland Fellowships that commence in the 2019 calendar year. We seek the best young experimentalists in energy science and engineering in the broadest sense. The Rowland Fellowship provides an opportunity to establish an independent program within the rich intellectual environment at Harvard.

Dr. Edwin H. Land founded the Rowland Institute in order to foster high-risk, creative research. In 2002, the Rowland Institute became part of Harvard with the mission of advancing the careers of experimental scientists and engineers at an early career stage. In the tradition of Dr. Land, we are particularly interested in young scholars with the potential to establish a ground-breaking research program in their chosen field.

The Rowland Fellowships are restricted to experimentalists at an early career stage (not more than five years beyond the receipt of their doctorate). Fellowship awardees will receive funding for salary and research expenses and are allocated their own laboratory space. The Rowland Institute also provides technical support from permanent staff.

The term of the fellowship is for up to five years, with a flexible start date. The stipend for Rowland Fellows will start at $73,000 per year, depending on the candidate’s experience. Fellows must have completed their doctoral degree prior to starting their term.

Instructions for applying to the program are to be found at the Rowland website:

www.rowland.harvard.edu/apply

The application deadline is Aug. 17, 2018.

Questions about the program should be directed to rf@rowland.harvard.edu or mail address:
